

Text description of 'Digital screen: 5 reasons you should test for HIV. Buckinghamshire branding'

5 reasons you should test for HIV

1. Anyone who is sexually active should take a test
2. Certain conditions can be a warning sign of HIV and your GP or healthcare professional may recommend testing.
3. HIV is easily treated
4. Once on effective HIV treatment you cannot pass HIV on to sexual partners
5. It's *better to know*. Regardless of the result, support and treatment are available for free on the NHS.

How can I get tested for HIV?

Ask your GP or visit bSHaW (book on 03003032880 or scan QR code to order a home test kit)

Scan to test!
